⁽i) On March 21, 2022, Globex announced that it acquired a 0.5% Gross Metal Royalty ("GMR") on 417 claims in Preissac, La Motte and Fiedmont townships, Quebec through a transaction involving First Energy Metals Ltd., Globex and a group of prospectors.

15. Loss Per Common Share

Basic loss per common share is calculated by dividing the net loss by the weighted average number of common shares outstanding during the year. Diluted loss per common share is calculated by dividing the net loss applicable to common shares by the weighted average number of common shares outstanding during the year, plus the effects of dilutive common share equivalents such as stock options.

Diluted net loss per share is calculated using the treasury method, where the exercise of options is assumed to be at the beginning of the year and the proceeds from the exercise of options and the amount of compensation expense measured, but not yet recognized in loss are assumed to be used to purchase common shares of the Corporation at the average market price during the period. Diluted loss did not include the effect of options for the three and six months ended June 30, 2023, as they are anti-dilutive.

⁽ii) On June 2, 2023, Globex signed a letter of intent agreement with Burin Gold Inc. ("Burin") to acquire a 100% interest in the Dalhousie Project, comprised of 31 claims located at 4 km south of Lac au Goéland and 53 km east of Matagami, Quebec. Under the terms of the agreement, Burin shall pay \$1,500,000 and issue 4,000,000 Burin shares to Globex and undertake \$5,000,000 in exploration over a four-year period to earn 100% interest in the property. Globex shall retain a 3% GMR on all payable metals subject to a 1% buyback for \$1,000,000 payable at anytime. Refer to note 19(i).

Stock-based compensation and payments

The Corporation uses the fair value method for stock options granted to directors, officers, employees and non-employees. Accordingly, the fair value of the options at the date of grant is charged to operations, with an offsetting credit to contributed surplus, over vesting periods (which can vary from immediate vesting to 5 years).

Globex uses the Black-Scholes option pricing model to estimate fair value using the following weighted average assumptions:

	June 30, 2023	December 31, 2022
Stock price	\$0.91	\$0.97
Expected dividend yield	Nil	Nil
Expected stock price volatility	58.78%	59.54%
Risk free interest rate	3.55%	2.91%
Expected life	5 years	5 years
Weighted average fair value of granted options	\$0.38	\$0.50

During the three and six months ended June 30, 2023, an expense of \$38,111 (three and six months ended June 30, 2022 - \$34,723) related to share-based compensation costs has been recorded and presented separately in the consolidated statements of loss and comprehensive loss.

The purchases by Globex will be effected through the facilities of the TSX and on other alternative trading systems in Canada and will be made at the market price of the shares at the time of the purchase.

During the six months ended June 30, 2023, 621,500 common shares (six months ended June 30, 2022 - 19,700 common shares) of Globex were purchased for cash consideration of \$467,014 (six months ended June 30, 2022 - \$20,651) in accordance with the NCIB.
