Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

The following Management's Discussion and Analysis ("**MD&A**") of the financial condition and results of operations of Globex Mining Enterprises Inc. (the "**Corporation**", "**we**" or "**Globex**") constitutes management's review of the factors that affected the Corporation's financial and operating performance for the three months ended March 31, 2023. This MD&A was prepared in compliance with the requirements of National Instrument 51-102 – *Continuous Disclosure Obligations*. This discussion should be read in conjunction with the unaudited condensed interim consolidated financial statements of the Corporation for the three months ended March 31, 2023 ("**Q1 2023**"), together with the notes thereto. Results are reported in Canadian dollars, unless otherwise noted. The Corporation's unaudited condensed interim consolidated financial statements and the financial information contained in this MD&A are prepared in accordance with International Financial Reporting Standards ("**IFRS**") as issued by the International Accounting Standards Board ("**IASB**") and interpretations of the IFRS Interpretations Committee. In the opinion of management, all adjustments (which consist only of normal recurring adjustments) considered necessary for a fair presentation have been included. Information contained herein is presented as of May 11, 2023, unless otherwise indicated.

For the purposes of preparing this MD&A, management, in conjunction with the Board of Directors (the "**Board**"), considers the materiality of information. Information is considered material if: (i) such information results in, or would reasonably be expected to result in, a significant change in the market price or value of the Corporation's common shares; (ii) there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision; or (iii) it would significantly alter the total mix of information available to investors. Management, in conjunction with the Board, evaluates materiality with reference to all relevant circumstances, including potential market sensitivity.

Further information about the Corporation and its operations is available on the Corporation's website at www.globexmining.com and on SEDAR at www.sedar.com.

This MD&A contains forward-looking information. See "Cautionary Note Regarding Forward-Looking Statements" below. As well, see "Risks and Uncertainties" below.

Description of Business and Nature of Operations

Globex is a North American focused exploration and project generator/property bank which seeks to create shareholder value by acquiring mineral properties, undertaking limited exploration and preparing the properties for optioning, joint venturing or outright sale, all with the goal of advancing the projects towards production.

As part of its total compensation arrangements, Globex seeks to secure long-term royalty arrangements that will provide continued financial benefits to Globex and its shareholders.

Currently, we are focused on acquiring and vending properties, acquiring properties which meet one or more of the following criteria:

- have historic or National Instrument 43-101 *Standards of Disclosure for Mineral Projects* ("**NI 43-101**") mineral resources;
- have reported past production;
- have established drill targets or drill intersections of economic merit, and
- are located on major geological structures.

Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

Under Globex property option agreements, generally the optionee gains the rights to and control of the property and the right to acquire an interest in the property in exchange for:

- a series of annual cash and/or share payments;
- an exploration work commitment; as well as
- a Gross Metal Royalty ("**GMR**") in favour of Globex.

Upon the satisfaction of the option terms, the property interest is transferred to the optionee. The option contract will terminate if annual payments and/or work commitments are not met. Globex may retain a GMR or other carried or participating interest in the property when it is transferred. Outright property sales may include cash and/or share payments and a form of royalty interest payable when projects achieve commercial production or another negotiated milestone.

Our current mineral portfolio consists of approximately 221 early to mid-stage exploration, development and royalty properties which contain **Base Metals** (copper, nickel, zinc, lead), **Precious Metals** (gold, silver, platinum, palladium), **Specialty Metals and Minerals** (manganese, vanadium, titanium dioxide, iron, molybdenum, lithium, cobalt, scandium, antimony, rare earths and associated elements) and **Industrial Minerals** (mica, silica, potassic feldspar, pyrophyllite, kaolin, dolomite as well as talc and magnesite).

Globex was incorporated under the laws of the Province of Québec and following the approval of shareholders on June 12, 2014, was continued under the *Canada Business Corporations Act*, effective October 28, 2014. The head office is at 89 Belsize Drive, Toronto, Ontario M4S 1L3 and the principal business office is at 86, 14th Street, Rouyn-Noranda, Québec, J9X 2J1, Canada.

Globex's common shares are listed on the Toronto Stock Exchange ("**TSX**") under the symbol GMX, and in Europe under the symbol G1MN on the Frankfurt, Stuttgart, Berlin, Munich, Tradegate, and Lang & Schwarz Stock, Long & Black, and TTM Zero Exchanges. Globex trades under the symbol GLBXF on the OTCQX International Exchange in the United States.

Economic Environment and Corporate Focus

Economic Environment

At this time, there appears to be consensus that while volatile, commodity prices will increase over the near-term forecast period as a result of the lack of new production capacity coming on stream. Commodities are priced globally in U.S. currency so their prices typically move in the opposite direction from the U.S. dollar.

During property acquisition, exploration, and financial planning, Globex's management monitors metal demand and supply balances as well as price trends. In addition to monitoring metal prices, management also monitors financing activities in the junior mining sector as this represents the sector in which both current and potential partners generate the financing needed to complete option arrangements with Globex.

Due to the worldwide COVID-19 pandemic, material uncertainties may come into existence that could influence management's going concern assumption. In particular, management cannot accurately predict the future impact that the COVID-19 pandemic may have on:

- Gold, silver, nickel, copper and zinc prices;
- Demand for gold, silver, nickel, copper and zinc and the ability to explore for gold, silver, nickel, copper and zinc;

Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

- The severity and the length of potential measures taken by governments to manage the spread of COVID-19, and their effect on labour availability and supply lines;
- Availability of government supplies, such as water and electricity;
- Purchasing power of the Canadian dollar; or
- Ability to obtain funding.

The following table highlights the comparative metal prices which the Corporation monitors:

Summary of Metal Prices					
Current Prices with Comparative (2019 – 2023)					
Commodities	Q1 2023 (USD)	2022 (USD)	2021 (USD)	2020 (USD)	2019 (USD)
Gold (\$/oz.)	1,980.50	1,815.40	1,829.80	1,898.00	1,516.80
Silver (\$/oz.)	23.91	23.88	23.30	26.37	17.82
Nickel (\$/pound)	10.68	10.54	9.43	7.54	6.32
Copper (\$/pound)	4.08	3.74	4.43	3.51	2.79
Zinc (\$/pound)	1.34	1.35	1.63	1.24	1.03

Financial and Operating Highlights

Corporate

During Q1 2023, an aggregate of 519,500 common shares were repurchased for cash consideration of \$390,674 under Globex's normal course issuer bid.

Revenues

In Q1 2023, Globex reported option income of \$122,084 (three months ended March 31, 2022 ("Q1 2022") – \$544,966) which consisted of cash receipts of \$87,500 (Q1 2022 - \$410,000) and shares in optionee corporations with a fair market value of \$34,584 (Q1 2022 - \$134,966).

- On January 11, 2022, Globex received a cash payment of \$25,000 from Brunswick in connection with the Lac Escalpe property. In addition, on February 15, 2023, Globex received 41,667 common shares with a fair value of \$34,584 from Brunswick.
- On January 12, 2023, Globex received a cash payment of \$62,500 from Maple Gold Mines Ltd. ("Maple") in connection with the Eagle Gold Mine property.

Outlook

The "Economic Environment and Corporate Focus" section above highlights that management monitors changes in demand/supply balance and metal price trends. Recently, we have seen a tepid revival in global markets in general and commodity markets in particular, other than battery metals and more recently gold.

For Q1 2023, our option/sale income were reported at \$122,084 as compared to \$544,966 for Q1 2022. We have continued our marketing efforts and are projecting option, sales and royalty revenues in excess of \$5,000,000 for 2023 based on existing contracts, current discussions and market conditions.

**Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023**

During 2021, the price of metals and minerals other than precious metals initially decreased adding pressure on exploration activities. Subsequently many of these metal prices reversed and rose to new highs.

While we are optimistic, we also recognize the risks and volatility that currently exist partly because of the uncertainty related to the current metal prices, the COVID-19 pandemic and world economic factors.

On the exploration front, we have developed plans and budgets with a view to gaining additional project knowledge and leveraging this into sale/option agreements.

Despite the potential risks and uncertainties, Globex believes it is well positioned with a combination of first-class assets as well as the human and corporate resources necessary to achieve our strategic objectives.

Environmental Contingency

The Corporation's exploration activities are subject to various laws and regulations relating to the protection of the environment. These environmental regulations are continually changing and are generally becoming more restrictive. As of March 31, 2023, the Corporation does not believe that there are any significant environmental obligations requiring material capital outlays in the immediate future.

Off-Balance Sheet Arrangements

As of the date of this MD&A, the Corporation does not have any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the Corporation including, without limitation, such considerations as liquidity and capital resources that have not previously been discussed.

Proposed Transactions

There are several proposed transactions that may be of a material nature being considered by the Corporation. The Corporation continues to evaluate properties and corporate entities that it may acquire in the future.

Results of Operations

Three months ended March 31, 2023 compared to three months ended March 31, 2022

The Corporation's net income totaled \$543,800 for Q1 2023, with basic and diluted income per share of \$0.01. This compares to a net loss of \$264,603 with basic and diluted loss per share of \$0.00 for Q1 2022. The increase in net income was principally due to:

- Revenues decreased to \$122,084 for Q1 2023 compared to \$544,966 for Q1 2022. In Q1 2023, Globex reported option income of \$122,084 (Q1 2022 – \$544,966).
- Exploration and evaluation expenditures decreased to \$262,559 for Q1 2023 compared to \$290,880 for Q1 2022. The decrease can be attributed to acquisition costs and exploration expenditures incurred on various projects. See "Mineral Exploration Properties" below for a summary of the exploration programs for Globex's property portfolio.
- Professional fees and outside services decreased in Q1 2023 to \$169,709 compared to \$192,855 for Q1 2022, primarily due to lower corporate activity requiring external professional support services.

Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

Professional fees and outside services consisted of investor relations, audit and accounting fees, management consulting, other professional fees, legal fees and filing fees.

- Administration fees decreased in Q1 2023 to \$106,429 compared to \$186,205 for Q1 2022. Administration fees consisted of office expenses, conventions and meetings, advertising and shareholder information, transfer agent, office maintenance and repairs and other administration.
- Gain on the sale of investments decreased in Q1 2023 to a gain of \$15,527 compared to a gain of \$531,898 for Q1 2022.
- Increase in fair value of financial assets increased in Q1 2023 to \$800,886 compared to a decrease of \$629,882 for Q1 2022. The increase in gain was due to the change in fair value of investments.
- Joint venture income increased in Q1 2023 to \$7,500 compared to a joint venture income of \$nil for Q1 2022. The increase was due the Corporation's 50% share of DAL net income during the period.
- All other expenses related to general working capital purposes.

The Corporation's total assets at March 31, 2023 were \$31,379,892 (December 31, 2022 - \$31,254,904) against total liabilities of \$181,696 (December 31, 2022 - \$209,834). During Q1 2023, operating activities generated outflows of \$389,782, financing activities generated outflows of \$390,674 and investing activities generated outflows of \$112,099. The Corporation has sufficient current assets to pay its existing liabilities of \$181,696 at March 31, 2023.

Liquidity and Capital Resources

At March 31, 2023, the Corporation had cash and cash equivalents of \$635,696 (December 31, 2022 - \$1,528,706). In addition, it had investments with a fair market value of \$21,095,653 (December 31, 2022 - \$20,091,218) which represents shares received under mining option and sale agreements.

The Corporation's working capital (based on current assets minus current liabilities) was \$24,600,953 at March 31, 2023 (December 31, 2022 - \$24,536,149).

Globex has a number of sale and option agreements in place and in discussion which are estimated to potentially generate gross option payments in excess of \$4.0 million in 2023. These payments are subject to the optionee having sufficient funds available to meet the obligations and option terms of potential new options being approved. We monitor the outstanding amounts on an ongoing basis.

The Corporation continues to negotiate option and royalty agreements and the potential sale of properties.

The Corporation believes that based on the current cash and working capital position and its access to liquidity sources, it has sufficient resources readily available to meet its current exploration spending commitments and corporate and administrative requirements for the next twelve months.

See "Cautionary Note Regarding Forward-Looking Statements" below.

Globex does not have any long-term debt or similar contractual commitments.

**Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023**

Cash Flow

During Q1 2023, operating activities generated outflows of \$389,782, financing activities generated outflows of \$390,674 and investing activities generated outflows of \$112,099.

Operating, financing and investing activities as well as the effect of exchange rate changes on cash held in foreign currencies during Q1 2023 resulted in a decrease in cash and cash equivalents of \$893,010.

Qualified Person

All scientific and technical information contained in this MD&A was prepared by the Corporation's geological staff under the supervision of Qualified Persons as defined in NI 43-101. The exploration and technical information presented in this MD&A has been reviewed by Pierre Riopel, Chief Geologist of Globex, who is a Qualified Person under NI 43-101.

Mineral Exploration Properties

Exploration expenditures in Q1 2023 totaled \$262,559 (Q1 2022 - \$290,880). During Q1 2023 and Q1 2022, exploration and evaluation expenditures were incurred on the various projects as follows:

Québec projects

During Q1 2023, exploration expenditures totalling \$193,248 were incurred on Québec projects.

Projects on which the largest expenditures were incurred during Q1 2023 are described below:

Great Plains (Clermont), Ruisseau Marriott (Hebecourt)

A 570 m drill hole testing off-holes anomalies was completed in the spring at the Great Plains property. The drill hole intersected several intervals with sulphides up to 20% in volume mainly composed of pyrrhotite and pyrite with some chalcopyrite and sphalerite. The best result is 0.52% Cu over 3.0 metres. A Pulse-EM down hole indicated an off-hole anomaly. A final report is in preparation.

One 828 m hole was drilled at Ruisseau Marriott testing the extension of a mineralized horizon at depth along a synvolcanic structure. The drill hole intersected several intervals with sulphides of up to 20% in volume mainly composed of pyrrhotite and pyrite. Chalcopyrite and sphalerite were not observed in significant quantity. No significant results were returned from the assays. A downhole pulse-EM survey was completed in this drillhole indicating two shallow, small and weak conductors. A final report is in preparation.

Blackcliff Gold Mine Joint Venture Property (Malartic Twp.)

A 1,994.5 metre, ten-hole drilling campaign was completed with 50% partner Altai Resources Inc. on the Blackcliff gold project. Drill holes tested openings on the main Blackcliff fold south flank horizon as well as the Lencour horizon further to the south of the property. **The best results from the main Blackcliff horizon returned 3.77 g/t Au over 1.2 metres in hole BK-22-01, 5.25 g/t Au over 1.0 metre and 1.0 g/t Au over 2.0 metres (where VG was identified) in hole BK-22-02 and finally 5.66 g/t Au over 1.0 metre, 2.02 g/t Au over 3.0 metres and 1.38 g/t Au over 5.1 metres in hole BK-22-09.** Six of the seven holes completed on the Lencour horizon returned anomalous gold but no grades similar to those obtained in 1959 by Lencour

**Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023**

Gold Mines Ltd. **Best results on the Lencour horizon returned 4.27 g/t Au over 1.0 metre in hole BK-22-04, and 1.06 g/t Au over 1.0 metre in hole BK-22-05.** Final report has been completed.

Rouyn-Merger (Rouyn and Joannes Twps)

From September to December 2022, prospecting including mapping and grab sampling was completed on the Rouyn-Merger property. Several phases of gabbro were identified including the gabbro hosting the East O'Neil mineralisation. **Fifty-seven samples were collected; best assays returned 14.09 g/t Au and 2.06 g/t Au.** One boulder was also sampled returning 0.9% Cu, 3.5 g/t Ag, and 0.2 g/t Au. Thirty-seven collars were found on the field allowing the repositioning of 215 historical drilling collars in our database. Additional field work is to be done in the summer of 2023; a drilling program will be prepared based on these results.

Mine Icon (O'Sullivan twp), Lac Meliyan (33B12), Tut Northeast (Céloron Twp.)

Compilation reports have been completed for these more recently acquired property.

Beauchastel-Rouyn (Beauchastel & Rouyn Twps)

Three drill holes were planned with the objective of testing the vertical extension of a gold structure just north of Lac Pelletier in Rouyn-Noranda. Permits were obtained but drilling was postponed to next year.

Laguerre-Knutson (Hearst & McVittie Twps)

Drilling targets were developed in the area of the 2006 Raven River drill holes intersects as well as the area south of the Knutson zone combining the geology interpretation, the old IP survey and the recent magnetic, high-resolution, airborne survey.

Tyrone (33G12)

A 171 kilometres airborne electromagnetic and magnetic survey was flown over parts of the Tyrone property located in the Eeyou Istchee James Bay area in Quebec.

Timmins Talc-Magnesite Deposit (Deloro Twp)

The TTM project database has been updated with the Qemscan data completed on 443 drill samples over a selection of 12 holes. This data were collected with the objective of updating the resource estimate. New sections, plan views and long-sections are being prepared.

Mineral property acquisitions

During Q1 2023, Globex spent \$8,088 on property acquisitions. Of particular interest is the acquisition of the Pointe-Aux-Morts dolomite deposit located in Ternet township, (12L05) Québec, just west of the town of Havre-St-Pierre. A 1981 report by Québec Iron and Titanium (GM38591) reports a 23,405,000 tonne resource of 30.05% CaO, 20.50% MgO and a small amount of silica nodules that can be easily removed.

As of June 29, 2022, the Globex/Agnico Eagle 50-50 Wood-Pandora joint venture in Cadillac Township, Québec has been terminated. Globex now retains a 100% interest in the Central-Cadillac and Wood Gold Mine properties including the high-grade Ironwood gold deposit.

Optioned and royalty properties.

Labyrinth Gold Mine Royalty Property (formerly named Russian Kid Deposit or Rocmec 1 Gold Mine)
(Dasserat twp.)

On April 11, 2022, Labyrinth Resources Limited ("**Labyrinth Resources**") provided an update on its Labyrinth Gold Project. The highlights of the nine-page press release are the following:

- Maiden underground exploration program at the flagship Labyrinth Gold Project in Québec is progressing well, with over 2,000 m of diamond drilling completed;
- Initial eight holes have all intercepted the targeted Boucher lode at planned depth, with core visually displaying a well-developed quartz vein hosting pyrite and chalcopyrite. The vein has ranged from 1.5 m to 6 m wide with a significant alteration assemblage consisting of sericite and carbonate up to 18 m wide;
- Visible gold intersected outside the current non-JORC resource between the Talus and Boucher lodes; this highlights potential to expand the known mineralization and validates Labyrinth Resources' initial appraisal of the resource; and
- **Compilation of a maiden JORC Resource (existing NI 43-101 foreign estimate is 2.1Mt at 7.1g/t Au for 479,000 oz) remains on track for delivery in 2022.**

On April 26, 2022, Labyrinth Resources provided the gold assay results from the first seven holes at the targeted Boucher lode. Highlights include:

- **7.5 m @ 7.01g/t Au** from 213 m in hole LABU-22-06 including 0.5 m @ 62.51g/t Au and 1.45 m @ 8.46g/t Au
- **2.8 m @ 5.2g/t Au** from 230 m in hole LABU-22-05 including 0.4 m @ 18.91g/t Au
- **1.5 m @ 4.68g/t Au** from 201 m in hole LABU-22-03 targeting shallow west extension of known Boucher modelled lode close to surface.

On June 7, 2022, Labyrinth Resources presented the latest results confirming the high-grade gold in multiple lodes at Labyrinth Gold Project. Results include:

- **2.75 m @ 7.25g/t Au** from 239 m (Boucher) in hole LABU-22-08 including 1.0 m @ 18.43g/t Au
- **3.65 m @ 5.41g/t Au** from 30 m (Talus) in hole LABU-22-09 including 0.3 m @ 43.06g/t Au
- **0.30 m @ 26.86g/t Au** from 90 m (McDowell) in hole LABU-22-12
- **16.75 m Boucher intercept @ 0.41g/t Au** from 309 m in hole LABU-22-14 on a perimeter of historic interpretation, confirming significant width proximal to localized high-grade zones.

On July 25, 2022, **Labyrinth Resources announced drilling returns 44g/t Au from a significant 125 m down-dip extension of known mineralization at the Labyrinth Gold Project.**

Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

• Partial assays received for the first surface hole at Labyrinth have returned an outstanding intersection 125 m down-dip of the currently defined Front-West lode, with assay result of:

- 2.20 m @ 10.67g/t Au from 143.5 m including 0.5 m @ 44.12g/t Au, and
- 1.00 m @ 7.43g/t Au from 147.8 m in hole LABS-22-01A as part of a broader mineralized interval of 8.10 m @ 4.05g/t Au from 143.5 m

On July 29, 2022, Labyrinth Resources announced that the high-grade results pave the way for a maiden JORC Resource at Labyrinth. Consultants RSC Mining and Mineral Exploration were engaged for the maiden JORC Resource study with delivery expected in September 2022.

On August 10, 2022, Labyrinth Resources announced the results from hole LABS-22-02, 375 m down-dip of the defined Boucher lode, intersecting **13.32 g/t Au over 1.4 m** including 20.53 g/t Au over 0.9 m.

On August 24, 2022, Labyrinth Resources announced the results from hole LABS-22-04, intersecting **5.63 g/t Au over 2.9 m including 7.9 g/t Au over 0.9 m** extending the McDowell lode 390 m down-dip.

On September 27, 2022, Labyrinth Resources announced an Initial Inferred Resources of 3Mt @ 5.0 g/t Au for 500,000 oz (at 3g/t Au cut-off).

On November 28, 2022, Labyrinth Resources announced an outstanding recovery achieved through Gravity/Flotation flowsheet, returning a low mass pull, high value 96 g/t Au concentrate at 97.3% recovery. Regrinding the floatation concentrate prior to cyanidation returned an overall 95.2% Au recovery to dore at low cyanide and lime consumption rates.

On March 6, 2023, Labyrinth Resources announced the completion of the drilling design for a phase two Resource growth program at the Labyrinth Gold Project. The drilling program is designed to infill the resource at depth between the current resource and the high-grade drill results that were released as part of the initial surface drill program, plus shallower, near mine mineralization.

Houlton Woodstock Deposit Royalty Property (Carleton County, New Brunswick)

On January 19, 2022, Manganese X Energy Corp. ("**Manganese X Energy**") released a new investor presentation providing an overview of the active project including Battery Hill.

On February 1, 2022, Manganese X Energy announced having achieved its third and final processing metallurgical phase for the Battery Hill Preliminary Economic Assessment (PEA). Kemetco Phase Three Metallurgical Highlights include:

- The successful completion of the final processing metallurgical phase for the Battery Hill PEA has resulted in a novel and innovative purification process to produce high-purity manganese sulphate monohydrate (HPMSM).
- Overall manganese recoveries as high as 80% were confirmed through locked-cycle mass balance calculations on the complete process flowsheet.
- Sulphuric acid consumption has been reduced dramatically which will result in significant cost reductions as well as permitting and environmental benefits.

Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

- The innovative purification process has resulted in a reduction in costs and improvements to the environmental footprint.
- Impurities were minimized to below 100 ppm, including that of calcium and magnesium, which is a crucial threshold level for battery grade HPMSM.

On June 27, 2022, Manganese X Energy released a Technical Report on the Preliminary Economic Assessment of the Battery Hill Manganese Project, Woodstock, New Brunswick, Canada with an effective date of May 12, 2022. Table 1-1, Table 1-2 and Table 1-3 below are reproduced from the Preliminary Economic Assessment report.

Table 1-1: Key Project Outcomes

Metric	Unit	Outcome
NPV ₁₀ (after tax)	US\$M	486
IRR (after tax)	%	25
LOM	years	40 years mine production 7 years stockpile reclaim

Inferred	3.3	4.73	8.26	391
Total Inferred		4.73	8.26	391

On October 11, 2022, Manganese X Energy announced plans to commence the pre-feasibility study in-fill and step-out drilling program at its wholly-owned Battery Hill Project.

On October 25, 2022, Manganese X Energy announced that it had kicked off its high-purity manganese sulphate monohydrate pilot plan which had begun at Kemetco Research Inc. in Richmond, BC, Canada.

On January 25, 2023, Manganese X Energy announced that it had completed 16 drill holes totalling 2,202 metres of the planned 4,725 metre, 31-hole program approaching the midway point of the 2023 Battery Hill Pre-feasibility drilling program.

On March 29, 2023, Manganese X Energy announced the initial results from its recent completed pre-feasibility diamond drilling program at Battery Hill consisting of infill and expansion drilling designed to upgrade existing inferred resources to Measured and Indicated categories in support of the project's upcoming Pre-Feasibility Study. Key Highlights are presented below:

- **84 m of 12.8% MnO starting at surface, including 78 m of 13% MnO, in SF22-66**
- **75.4 m of 11.2% MnO starting at 8 m, including 71.4 m of 11.4% MnO, in SF22-65**
- **57.8 m of 14.6% MnO starting from 4.2 m, including 31.8 m of 19% MnO, in SF22-63**
- **56.5 m of 12.28% MnO starting at 5.5 m, including 40.8 m of 15.7% MnO, in SF22-64**
- **26 m of 13.3% MnO starting at 69 m in hole SF22-59**
- **20 m of 14.7% MnO starting at 92 m in hole SF22-60**

Mont Sorcier Royalty Property (Roy twp)

On July 22, 2022, Voyager Metals Inc. ("**Voyager**") announced an updated mineral resource estimate at its Mont Sorcier Iron and Vanadium Project in Québec effective June 9, 2022.

Zone	Category	Tonnage				Head grade										Conc. Fe (%)
		Rock (Mt)	Fe Rec (%)	Wrec (%)	Conc. (Mt)	Fe2O3 (%)	Fe (%)	Fe3O4 (%)	Fe mag (%)	V ₂ O ₅ (%)	TiO ₂ (%)	MgO (%)	SiO ₂ (%)	%S (%)

On March 8, 2023, Voyager Metals announced Business Combination with Cerrado Gold.

Globex retains a 1% GMR royalty on all iron produced from the property.

**Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023**

Kewagama Royalty Property (Cadillac twp)

On January 12, 2022, Radisson Mining Resources Inc. ("**Radisson Mining**") reported multiple high-grade gold intersections in what it calls the #4 Trend which is entirely within **Globex's Kewagama royalty (2% NSR)** claims and also in the #3 Trend down plunge to the east, which is largely on Globex's Kewagama royalty claims.

Highlights:

Trend #4

31.56 g/t Au over 2.00 m
13.83 g/t Au over 2.40 m

Trend #3

15.68 g/t Au over 2.00 m
11.75 g/t Au over 2.50 m

On September 13, 2022, Radisson Mining announced significant intercepts along high-grade trend #3. Drill hole OB-21-279 intersected **17.11 g/t Au over 2.00 m and 5.16 g/t Au over 1.70 m**. Drill hole OB-21-275 intersected **12.66 g/t Au over 1.80 m including 27.90 g/t Au over 0.80 m**. Along high-grade trend #4, drill hole OB-22-298 intersected **8.69 g/t Au over 2.20 m including 29.50 g/t Au over 0.60 m** while drill hole OB-21-296 intersected **7.73 g/t Au over 2.00 m including 15.00 g/t Au over 1.00 m**.

On March 2, 2023, Radisson Mining announced a significant increase in Indicated and Inferred Resources without breaking down the distribution of the gold resources in the various mineralized trends, although it does indicate that gold Trends #2, #3 and #4, which plunge eastward on our Kewagama Gold Mine royalty asset, remain open below 900 m, 500 m and 500 m, respectively.

In addition, Radisson Mining states that "Mineral resources are open for an additional 750 m to the east" indicated as Trend #5, where Globex's Kewagama Gold Mine royalty asset abuts against the 100%-owned Central Cadillac-Wood Gold Mines property to the east.

On April 17, 2023, Radisson filed Ni 43-101 for O'Brien gold project Resource Estimate prepared by SLR Consulting on Sedar. Indicated resources increased 58% to 1,517,000 tonnes grading 10.26 g/t Au for 501,000 ounces using a 4.5 g/t gold cut off grade.

Inferred resources increased 167% to 1,616,000 tonnes grading 8.64 g/t Au for 449,000 ounces using a 4.5 g/t gold cut off grade.

A large portion of the Indicated and Inferred resources added have been defined within the same vertical footprint as the previous resource estimate. 127,600 m of additional drilling since last update in July 2019. The inclusion of the O'Brien West area (including 8,060 m of historical drilling).

Fontana Royalty Property (Duverny)

On December 7, 2021, Tres-Or Resources Ltd. ("**Tres-Or**") announced the completion of its option agreement to acquire a 100% interest in 23 mineral claims comprising the Fontana Gold Project subject to **Globex retaining a 2% NSR**.

Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

The Fontana Gold Project has been the subject of considerable past work, including the sinking of a 92-metre shaft, excavation of 242 metres of underground workings, completion of over 300 drill holes, and processing of 22,047 tonnes of bulk sample material yielding 1,450 ounces of gold.

On January 19, 2022, Tres-Or announced that it had received TSX approval for an Amended and Restated Option Agreement with Kiboko Gold Inc. ("**Kiboko Gold**") as per a Tres-Or news release dated December 1, 2021.

On July 21, 2022, Tres-Or announced that all terms of the Amended and Restated Option Agreement with Kiboko Gold dated November 30, 2021, had been completed. Kiboko Gold is now the operating company of the Globex royalty claims which cover a significantly larger area.

On September 19, 2022, Kiboko Gold announced having commenced 12,450 m of drilling at the Fontana area of the Project. The planned program, which is subject to modification, consists of 3,945 m of orientated HQ diamond drilling (18 holes) and 8,505 m of 5.5-inch reverse-circulation ("**RC**") drilling (64 holes). The Phase 1 exploration program is fully funded and is expected to be completed in the first quarter of 2023.

On January 26, 2023, Kiboko Gold reported assay results from 26 holes totaling 3,449 metres which are part of an ongoing systematic 11,000 metre, 67-hole verification program in the Main Fontana Gold Zone.

Highlights reported are as follows:

- **8.7 g/t Au over 9 m (RCFON22-021), including 22.2 g/t Au over 3 m**
- **23.9 g/t Au over 3 m (RCFON22-026), including 35.4 g/t Au over 2 m**
- **47.2 g/t Au over 1 m (DDFON22-004)**
- **7.2 g/t Au over 2 m (RCFON22-006), including 14.0 g/t Au over 1 m**
- **8.4 g/t Au over 1 m (RCFON22-018)**
- **3.3 g/t Au over 2 m (RCFON22-002)**
- **3.2 g/t Au over 2 m (RCFON22-022)**
- **2.3 g/t Au over 2.5 m (DDFON22-007)**
- **5.2 g/t Au over 1 m (RCFON22-026)**
- **5.2 g/t Au over 1 m (RCFON22-004)**

Drill results are pending upon an additional 31 holes. Numerous other lower grade intersections were also reported upon which Kiboko Gold intends to undertake further evaluation.

On March 29, 2023, **Kiboko Gold announced the completion of 10,870 m of drilling over 68 holes** on its Harricana Gold Project. No more preliminary assays will be reported, Kiboko Gold believes that the areas targeted in the Phase 1 exploration program have the potential to support a near-surface pit constrained mineral resource estimate. **Kiboko Gold is targeting the reporting of a maiden mineral resource for a portion of the Fontana area of the Harricana Project in mid-2023 subject to the timely receipt of the final assay results.**

Joutel Eagle Option Property (Joutel, Valrenne)

On April 6, 2022, Orford Mining Corporation ("**Orford Mining**") announced that it had compiled approximately 20,000 metres of historical drilling which allowed it to identify multiple gold zones to guide immediate exploration efforts. On April 16, 2022, Orford Mining announced two drill holes completed on the South Gold Zone intersected multiple zones of quartz and pyrite. Samples were sent for analysis.

Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

On May 12, 2022, Orford Mining reported encouraging preliminary drill results from the Joutel Eagle Gold Property. Highlights include:

- Confirmation of the location of the historical "South Gold" mineralization system on the Joutel Eagle Property.
- Grades of up to 10.8 g/t Au over 0.84 metres included in a wider interval were intersected in drill hole 22-JE-002. This is higher than those reported historically from the system nearby hole 82-02 which reported up to **5.5 g/t Au over 1.43 metres**.
- Higher grade sections associated with quartz veining occur within broader lower-grade intervals with abundant disseminated sulphides. Such intervals include **9.35 metres grading 2.20 g/t Au and 7.13 metres grading 1.70 g/t Au in hole 22-JE-002**.

On June 7, 2022, Orford Mining reported drill hole assays from its winter drilling at the Joutel Eagle Gold Property. Highlights include:

- Grades of up to 14.7 g/t Au over 0.64 metres included in an interval of **1.11 g/t Au over 20.64 metres** were intersected in drill hole 22-JE-003. Orford Mining has increased the width of the mineralization in drill hole 22-JE-002 to **1.24 g/t Au over 28.10 metres** within a much broader lower-grade horizon of **0.97 g/t Au over 46.98 metres**.
- The lower mineralization horizon encountered in holes 22-JE-002 and 22-JE-003 contains massive to semi massive sulphides in a graphitic matrix, similar to what was encountered historically at the Eagle-Telbel mine along strike to the southeast.

On December 1, 2022, Orford Mining reported the completion of a 718 line-kilometre helicopter airborne electromagnetic survey on its Joutel Eagle Gold Property. Orford Mining was also preparing for a 2,000 metre drilling program focussed on the South Gold Zone.

On February 21, 2023, Orford Mining provided an update on the drilling at the Joutel Eagle Gold Property. The drill holes focused on the South Gold Zone intersected the following:

Hole 23-JE-004: **4.1 g/t Au over 14.6 m, including 28.7 g/t Au over 0.32 m.**

Hole 23-JE-005: **1.5 g/t Au over 8.3 m, including 4.6 g/t Au over 0.9 m.**

More drilling results are pending.

On March 30, 2023, Orford Mining reported that it has drilled a possible new gold bearing horizon 150 meters to the north of the South Gold Zone on the Joutel Eagle Property ("Joutel Eagle"). Hole 23-JE-007 has reported **1.3 g/t Au over 16.1 metres** from 201.0 meters including higher grade intervals of up to 4.5g/t Au over 1.1 m, in a previously untested area of the Joutel Eagle Property. New Results from hole 23-JE-015 in the South Gold Zone reported **1.10g/t Au over 54.7 meters** including higher grade intervals of up to **9.1g/t over 0.4 m**. This hole was drilled in the South Gold Zone, 25 meters southeast of the previously reported results from 23-JE-004 (**14.6 meters of 4.1 g/t**).

On April 20, 2023, Orford Mining has reported additional wide gold intersections on the Joutel Eagle property under option from Globex. Hole 23-JE-008 drilled into the South Gold Zone has intersected "two thick intersections of gold mineralization: 15.7 meters @ **1.7g/t Au (21.7 to 35.1 meters) and 14.2 meters @ 2.2g/t Au** (61.9 to 70.1 meters) which is approximately 200 meters to the north west of hole 23-JE-015 which reported **54 meters @1.1 g/t Au** including higher grade intervals, of up to 9.1g/t Au over 0.4 meters.

Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

Hole 23-JE-009, reported 0.3 meters @ 1.2g/t Au as it appears to have been drilled too far to the north as the South Gold Zone appears to move toward the south proximal to the 23-JE-008 collar which was collared in gold mineralization. 23-JE016 was drilled to confirm the presence of the South Gold Zone to the south of hole 23-JE-008. We have now received results for a 250 m strike length of the tested 400m strike of south gold zone.”

Magusi Option (Hebecourt)

Due to difficult market conditions, Globex has extended the next option payment due by Electro Metals and Mining Inc. (“**Electro**”) to March 2023.

On February 24, 2023, Electro, a private Canadian corporation which optioned the Magusi polymetallic (Cu, Zn, Ag, Au) project located 55 km northwest of Rouyn-Noranda, Québec in 2022, signed a non-binding letter of intent with Shine Box Capital Corp., a “capital pool company” (RENT.P-TSXV), under which the parties will combine their business operations. The reverse takeover of Shine Box Capital Corp. by Electro is subject to Electro successfully completing a financing in order to advance the Magusi deposit toward production and to undertake exploration on the large claim package.

Eagle Gold Mine Option Property (Joutel)

On April 21, 2022, Maple Gold Mines Ltd. (“**Maple Gold**”) provided an update on winter drilling activities and upcoming exploration plans. A 3D model of the mine was completed. Eight drill holes were completed in a phase I campaign testing a possible secondary shoot of mineralization adjacent to the main shoot historically mined at the Eagle Mine Property. An additional deeper 960 m hole was being drilled and three deeper sites (up to 1,350 m) were being permitted.

On June 20, 2022, Maple Gold reported phase I drill results at the Eagle Mine Property. Highlights include:

- Drill hole EM-22-005 intersected **4.0 g/t Au over 7.5 m**, including 6.4 g/t Au over 3.0 m, within a semi-massive pyrite and iron carbonate horizon typical of historical Eagle-Telbel style of mineralization.
- Drill hole EM-22-001 intersected **4.4 g/t Au over 0.9 m** within quartz-carbonite veinlets containing visible gold.
- Drill hole EM-22-002 intersected **2.4 g/t Au over 4.7 m**, including **3.8 g/t Au over 2.1 m**, within highly altered, graphitic and pyritic Harricana Group sediments, as well as **2.1 g/t Au over 1.8 m** further up hole in altered microgabbro.

On July 19, 2022, Maple Gold announced having completed a regional airborne Mag-EM survey and identified new drill targets at Douay and Joutel.

On August 15, 2022, Maple Gold reported an intercept of **11.4 g/t Au over 3 metres including 24.4 g/t Au over 1.0 metres** in drill hole EM-22-009 located to the north of the main modeled Eagle mine horizon in the hanging wall microgabbro.

On December 13, 2022, Maple Gold reported results for four drill holes and partial results for an additional five drill holes at the Eagle Mine Property. Highlights are:

Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023

- 2022 drilling results demonstrate vertical continuity of the South Mine Horizon over a 350 m vertical interval from surface; known mineralization extends to approximately 800 m vertical depth on adjacent sections and remains open along strike to the northwest as well as at depth;
- Drill hole EM-22-13 intersected **2.3 grams per tonne ("g/t") gold ("Au") over 10.4 m**, including 5.0 g/t Au over 3.2 m (from 257 m downhole).
- Drill hole EM-22-16 intersected **3.1 g/t Au over 7.3 m**, including 4.0 g/t Au over 3.6 m (the latter from 193 m downhole).
- Drill hole EM-22-10 intersected **14 g/t Au over 0.5 m** (from 539.5 m downhole) and **8.3 g/t Au over 1.0 m** (from 543 m downhole); this hole also tested the South Mine Horizon more than 200 m further to the southeast.
- All reported drill holes contained gold mineralization (over 1 g/t Au) and seven of the nine reported drill holes contained multi-gram gold intercepts (2 g/t Au or better).
There are still approximately 2,250 m of assays currently pending at Eagle, with a further approximately 1,500 m of drilling to be completed this year.

On January 9, 2023, Maple Gold reported the additional results for the five follow-up drill holes at the Eagle Mine Property. Highlights are:

- Drill hole EM-22-015 intersected **10.3 g/t Au over 7.8 m, including 41.1 g/t Au over 1.0 m** in the North Mine Horizon.
- Further up-hole, EM-22-015 intersected **4.3 g/t Au over 3.9 m**, including **6.6 g/t Au over 2.0 m**, demonstrating the potential for the North Mine Horizon to be wider than what was previously interpreted.
- The EM-22-015 intercepts are located down-plunge from historical high-grade, near-surface drill results from a geologically similar hole (E-19: **19.6 g/t Au over 7.9 m**, as well as **17.5 g/t Au over 5.6 m** further up-hole) in an area with limited drilling that remains open further down-plunge.
- EM-22-015 has now returned seven separate intercepts over a 120 m interval starting from 142.5 m downhole.
- Assays are still pending for roughly 20% of Maple Gold's 2022 drilling at Eagle.

On April 6, 2023, Maple Gold has provided results from the final 20% of assays that were received from the previously completed 14,720 metres ("m") of drilling at the Eagle Mine Property.

The final batch of assays received from drilling completed at Eagle corresponds to approximately 3,000 m of the 14,720 m drilled to-date. The results continue to demonstrate continuity of mineralization and the potential significance of the multiple horizons/splays to the northwest of the former Eagle mine. Highlights include:

- EM-22-008W intersected 6.2 grams per tonne ("g/t") gold ("Au") over 2.0 m in the South Mine Horizon ("SMH") and **4.2 g/t Au over 3.9 m** in sediments further downhole.
- EM-22-006W1 intersected multiple intercepts including **6.5 g/t Au over 1.2 m and 2.0 g/t Au over 3.0 m** in the SMH and **2.3 g/t Au over 3.0 m** at the microgabbro/Harricana sediment contact further downhole.
- EM-22-006W4 intersected 4.0 g/t Au over 0.7 m within a broader **1.1 g/t Au over 14.2 m** intercept within the SMH.
- EM-22-017A intersected 2.9 g/t Au over 2.0 m and additional lower grade over broader near-surface intervals (**1.0 g/t Au over 15.5 m** from 93 m downhole).

Dated: May 11, 2023**

Nordeau Royalty Property (Vauquelin, Pershing and Denain)

On October 13, 2022, Cartier Resources Inc. ("**Cartier**") published the results of an NI 43-101 Report making a reference to the West Nordeau gold deposit which has been upgraded and is now incorporated into the Chimo Mine Gold System.

The West Nordeau gold deposit is one of several mineralized gold zones on the property formerly called by Globex the Nordeau Project and now referred to by Cartier as the East Cadillac Property, consisting of 54 cells or portions of cells totalling 1,500 hectares.

In the October 13, 2022, Cartier press release, the following **Indicated and Inferred Resources are reported on the West Nordeau claim block:**

Gold Corridor Cut-off Grade (g/t Au)	Indicated Resources			Inferred Resources		
	Metric Tonnes (t)	Grade (g/t Au)	Troy Ounces (oz Au)	Metric Tonnes (t)	Grade (g/t Au)	Troy Ounces (oz Au)
North Gold Corridor (>2.0)	-	-	-	151,000	3.50	17,000
Central Gold Corridor (>1.5)	512,000	2.19	36,000	3,084,000	2.60	258,000
Total	512,000	2.19	36,000	3,235,000	2.64	275,000

The new total resource of 311,000 oz. Au is double the previous reported resource and using the \$64.80 per ounce dollar value of Globex's royalty as reported by Cartier indicates a present in the ground value of just over \$20,000,000. Cartier has indicated that it intends, in its next exploration program, to drill the deposit to depth.

On November 15, 2022, Cartier reported intersecting **3.3 g/t Au over 4.6 m including 9.56 g/t Au over 1 m** in mineralized intersection at a vertical depth of 800 metres on the downdip and plunge of the West Nordeau Deposit.

On January 24, 2023, Cartier announced drill results below the West Nordeau deposit of the Chimo Mine Gold System.

In the eastern part of the West Nordeau deposit (5NE2 Gold Zone), drilling intersected **4g/t Au over 6.5 m** included within broader sections grading 2.3 g/t Au over 23.0 m and **2.1 g/t Au over 14.0 m**.

In the western part of the West Nordeau deposit (5NE1 Gold Zone), drilling intersected **3g/t Au over 1.0 m** included within an interval grading **2.4 g/t Au over 5.6 m**.

On March 2, 2023, Cartier announced intersecting **17,4 g/t Au over 1.0 m** inside the 2 Gold Structure belonging to The West Nordeau area.

On April 13, 2023, Cartier delivered positive Preliminary Economic Assessment (PEA) that includes 275,000 oz Au from the Nordeau West deposit. Highlights are listed below:

- Long term gold price of US\$1,750/oz, Exchange rate of CAD \$1.00 = US\$0.77
- Post-tax NPV5% of CAD\$388M and IRR of 20.8%
- Post-tax payback period of 2.9 years and mine life of 9.7 years
- Capex of CAD\$341M
- Average all-in sustaining cost of US\$755/oz

**Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023**

- Average annual production of 116,900 oz
- 4,500 tpd underground operation
- Average sorted grade of 4.55 g/t Au for mill feed
- Processing plant with capacity of 3,000 tpd and rate of recovery of 93.1%
- Sorting of mineralization increases the grade of material prior to milling operations and recovery rate and also reduces costs of mill construction, material handling, milling and restoration leading to a reduced environmental footprint of mine tailings and thus increasing the social acceptability of the project.

Sales and option income for Q1 2023

Property, Agreements Summary	Cash (\$)	Shares and warrants (\$)
Option and sale payments under agreements and advance royalties		
Brunswick Exploration Inc., Lac Escalé property, cash of \$25,000 and 41,667 common shares with a fair value of \$34,584	25,000	34,584
Maple Gold Mines Ltd., Eagle Gold Mine Property, cash of \$62,500	62,500	nil
Sales, option income for the period	87,500	34,584

In Q1 2023, Globex generated sales and option income which exclude numerous other royalty properties on which many partners may be working. The sales and option income of \$122,084 consisted of cash receipts of \$87,500 and shares in optionee corporations with a fair value of \$34,584.

In Q1 2022, Globex generated sales and option income which exclude numerous other royalty properties on which many partners may be working. The sales, option income and advance royalties of \$544,966 consisted of cash receipts of \$410,000 and shares in optionee corporations with a fair value of \$134,966.

Royalties

At March 31, 2023, 89 royalty arrangements were in effect at various stages.

The Corporation's Annual Information Form for FY 2022 and website www.globexmining.com provide Property Descriptions, a list of Royalty Interests, as well as the optionees of the various properties.

Related Party Transactions

	March 31, 2023 (\$)	December 31, 2022 (\$)
Related party receivable		
Chibougamau Independent Mines Inc.	22,115	63,454
Total	22,115	63,454

The receivables due from the related parties bear no interest, are without specific terms of repayment and are not secured.

**Globex Mining Enterprises Inc.
Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023**

As reflected in the unaudited condensed interim consolidated statement of cash flows, there was a net cash decrease of \$41,339 in the related party receivable balance during Q1 2023 (Q1 2022 - decrease of \$5,779 in related party receivable balance).

Chibougamau Independent Mines Inc. ("CIM")

CIM is considered a related party as Globex management consisting of the President and Chief Executive Officer ("CEO") and a director hold the same positions with both entities. In addition, the President and CEO holds a large number of common shares of both organizations through Géoconseil Jack Stoch Ltée, a private company which is a large shareholder of CIM and Globex and therefore can significantly influence the operations of both entities.

Management services

On December 29, 2012, Globex entered into a Management Services Agreement with CIM under which the Corporation agreed to provide management services including administrative, compliance, corporate secretarial, risk management support and advisory services to CIM.

Management services income of \$3,315 in Q1 2023 (Q1 2022 - \$2,872) represents Globex's estimate of the specific costs related to performing these services in accordance with the Management Services Agreement.

All related party transactions disclosed above were at the agreed amounts that approximate fair value.

Management compensation

The total compensation for the respective periods paid to directors and key management personnel having authority and responsibility for planning, directing and controlling the activities of the Corporation (management personnel includes the President and CEO, Chief Financial Officer ("CFO"), Treasurer and Corporate Secretary) are as follows:

	Three Months Ended March 31, 2023 (\$)	Three Months Ended March 31, 2022 (\$)
Management compensation		
Salaries and other benefits	68,610	68,450
Professional fees and outside services (i)	19,244	21,386
Total	87,854	89,836

(i) In Q1 2023, management consulting fees of \$19,244 (Q1 2022 – \$21,386) were paid to the CFO and the Corporate Secretary. They were appointed on September 20, 2017. As at March 31, 2023, the balance due to the CFO and Corporate Secretary is \$17,143 (December 31, 2022 - \$32,844) which is included in payables and accruals due under normal credit terms.

Management's Discussion & Analysis
Three Months Ended March 31, 2023
Dated: May 11, 2023**

Share Capital

As at the date of this MD&A, the Corporation had 55,265,336 common shares and 2,540,000 stock options outstanding, which resulted in fully diluted common shares of 57,805,336.

Normal Course Issuer Bid

On July 27, 2022, the Corporation announced that the TSX had again approved the renewal of the Corporation's normal course issuer bid ("**NCIB**"). Under the NCIB, the Corporation is entitled to repurchase for cancellation up to 1,000,000 common shares, representing 1.8% of Globex's issued and outstanding shares as of July 21, 2022, over a twelve-month period starting on August 2, 2022, and ending on August 1, 2023. The purchases by Globex may be affected through the facilities of the TSX and on other alternative trading systems in Canada and will be made at the market price of the shares at the time of the purchase.

During Q1 2023, 519,500 common shares of Globex were purchased for cash consideration of \$390,674 in accordance with the NCIB.

Disclosure of Controls and Procedures and Internal Controls Over Financial Reporting

Management is responsible for establishing and maintaining adequate disclosure controls and procedures ("**DCP**") as well as internal controls over financial reporting ("**ICFR**") as described in our 2022 annual MD&A.

The Corporation's CEO and CFO, with the participation of management last completed an evaluation of the design and operating effectiveness of the Corporation's DCP's and ICFR's as at December 31, 2022. Based on that assessment, management concluded that the Corporation's ICFR were operating effectively at December 31, 2022 which was based on the COSO Model.

During Q1 2023, the CEO and CFO have evaluated whether there were changes to the ICFR that have materially affected, or are reasonably likely to materially affect, the ICFR. No such significant changes were identified through their evaluation which was based on the COSO Model.

Risks and Uncertainties

The exploration, development and mining of mineral resources are highly speculative in nature and are subject to significant risks. Such investment should be undertaken only by investors whose financial resources are sufficient to enable them to assume these risks and who have no need for immediate liquidity in their investment. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Corporation and its financial position. Please do refer to the section entitled "Risks and Uncertainties" in the Corporation's MD&A for the fiscal year ended December 31, 2022, available on SEDAR at www.sedar.com.

Cautionary Note Regarding Forward-Looking Statements

This MD&A contains certain "forward-looking information" as defined in applicable securities laws (collectively referred to herein as "**forward-looking statements**"). These statements relate to future events or the Corporation's future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "budgeted", "scheduled", "estimates", "continues", "forecasts", "projects", "predicts", "intends", "anticipates" or "believes", or variations of, or the negatives of, such words and
