Emperor has reported in today’s [press release](#) that they have completed 2,500 metres of the 8,000 metre drill program. The first 2,500 metres was focused on the western conceptual open-pit model discussed in previous Emperor press releases.

The remaining 5,500 metres will now focus on the NIP Gold Zone near the eastern boundary of the property and the area between the conceptual open-pit model and the NIP Zone (see **Figure 1** below) with the focus of joining the two.
