Globex Acquires Kewagama Gold Mine Royalty

Rouyn-Noranda, Québec, Canada. GLOBEX MINING ENTERPRISES INC. (GMX – Toronto Stock Exchange, G1MN – Frankfurt, Stuttgart, Berlin, Munich, Tradegate, Lang & Schwarz Stock Exchanges and GLBXF – OTCQX International) is pleased to announce that it has purchased a 2% Net Smelter Royalty (NSR) on three claims that constitute the Kewagama Gold Mine Property located in Cadillac Township, Quebec.

The Kewagama Gold Mine is owned by Radisson Mining Resources Inc. (RDS-TSXV) and forms the eastern portion of their O’Brien Gold Project covering an area of 111.7 ha (276 acres).

In a March 20, 2018 press release, Radisson reported a NI 43-101 Resource Estimate on the combined 36E Gold Zone and Kewagama property as well as a portion of the recently discovered Vintage Gold Zone. At a cut-off of 3.5 g/t Au, the following resources were reported.

Indicated Resource		
Tonnes	Grade (g/t Au)	Contained oz Au
1,125,447	6.45	233,491
Inferred Resource		
1,157,021	5.22	194,084

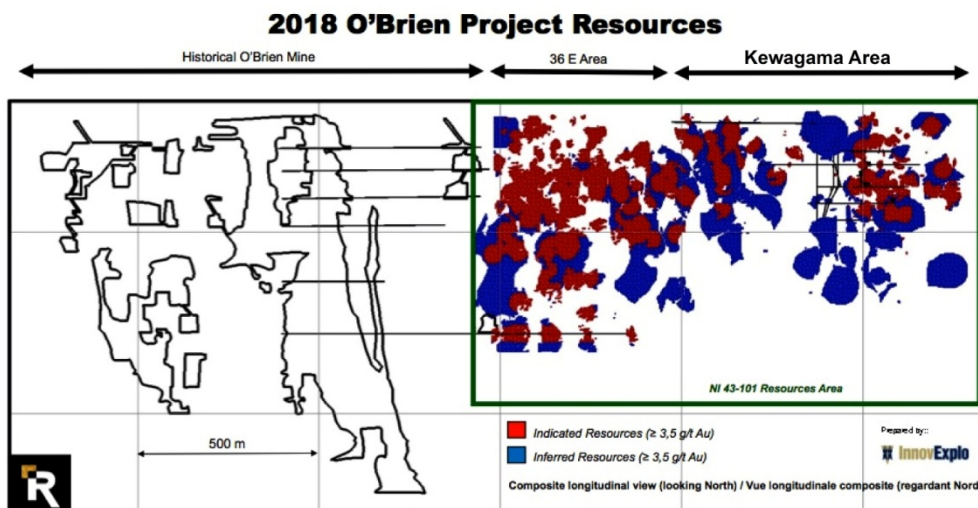

Note: Mineral Resources are not Mineral Reserves and as such have not demonstrated economic viability.

The resource estimate was produced by InnovExplo Inc. under the direction of Independent QP Christine Beausoleil, P.Geo with an effective date of March 20, 2018. Globex has not reviewed the NI 43-101 report as it has not yet been posted on SEDAR and thus should not be relied upon.

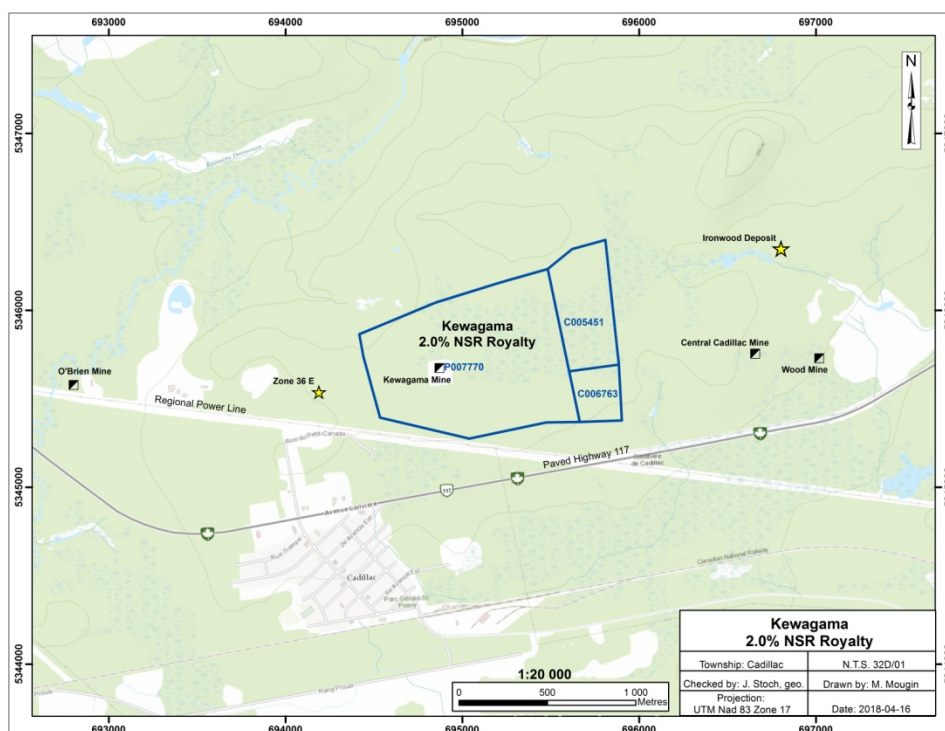

Preliminary metallurgical testing in 2014 demonstrated combined recoveries in the 93-94% range by flotation or cyanidation with gravity concentration.

Kewagama Project Highlights

- The Kewagama Gold Mine property straddles the world class gold localizing Cadillac Fault.
- The property adjoins on strike to the west, the O’Brien Gold Mine, one of the highest grade gold mines in the Abitibi Greenstone Belt with reported production of 1,197,147 tonnes grading 15.25 g/t Au (InnovExplo Report, April 2015 per Radisson website)
- The gold resource covered by the Kewagama Royalty is open to depth.
- The new Vintage Gold Zone north and parallel of the main 36E-Kewagama resource is open both along strike and to depth.
- The deepest hole on the Vintage Zone (OB17-49) assayed 6.9 g/t Au over 4 m.
- The NI-43-101 resource is projected to be accessible in part using existing infrastructure at the O’Brien and Kewagama Gold Mines
- Other zones, depending upon additional work, may be added to the resource estimate.
- 32,000 meters (104,987 ft) of drilling was undertaken by Radisson in 2016 and 2017, 29,787 m of which was incorporated into the current resource estimate.
- Over 5,000 m of drilling was completed on the Vintage Gold Zone since the resource estimate cut-off date.
- The Kewagama Royalty adjoins to the east, Globex’s Wood-Pandora Joint Venture Property which includes the historical Central Cadillac, Wood and Pandora Mines as well as the Ironwood Gold Deposit.
