## Labyrinth Vends Globex Royalty Property

Rouyn-Noranda, Quebec, Canada. GLOBEX MINING ENTERPRISES INC. (GMX – Toronto Stock Exchange, G1MN – Frankfurt, Stuttgart, Berlin, Munich, Tradegate, Lang & Schwarz, LS Exchange, TTMzero, Düsseldorf and Quotrix Düsseldorf Stock Exchanges and GLBXF – OTCQX International in the US) wishes to inform shareholders that Labyrinth Resources Ltd. (LRL-ASX) have entered into a Project Acquisition Agreement (PAA) with private company Gold Projects WA Pty Ltd. (GPWA) wherein Labyrinth is selling the Labyrinth (formerly called Russian Kid Mine or Rocmec Gold Mine) gold deposit to GPWA. [Click here to view Labyrinth press release dated January 8, 2024](#) for more information.

GPWA is a special purpose vehicle set up to facilitate the transaction. The shareholders of GPWA are Casey Group Holdings Pty Ltd. (a first nation mining, civil and construction company) holding 51% and Erasano DMCC, a precious metals trading company based in Dubai, holding 49%.

Globex retains a 5% Gross Metal Royalty on the first 25,000 ounces of all metals produced from the property, including gold and silver and a 3% Net Metals Royalty thereafter. As reported by Labyrinth, GPWA will assume “all royalties and physical gold payment obligations under the PAA”.

The Net Metal Royalty is paid in cash or in kind at Globex’s exclusive option by a refinery and is not subject to deductions of any kind. The term Net Metal Royalty is more commonly referred to as Gross Metal Royalty in subsequent Globex press releases and dates back to the original agreement signed on April 12, 2005.

The Labyrinth Gold Mine project is located in Dasserat Township Quebec, 57 km west-northwest of Rouyn-Noranda at the Quebec/Ontario border. Previous exploration outlined a historic [NI 43-101 resource of 2.1 million tonnes grading 7.1 g/t Au for 479,000 oz. of gold](#) (including 120,000 oz. Au in measured and indicated categories). Subsequently, **Labyrinth announced in September 2022, that a JORC-Compliant Inferred Mineral Resource of 3 million tonnes at 5.0 g/t Au for 500,000 oz. Au was estimated at a 3 g/t Au cut-off. There was a notable high-grade component of 150,000 oz. Au at 10 g/t Au (above 6 g/t Au cut-off) (per Rene Sterk Consulting).** The orebody is accessible via an existing ramp and three levels.

Work by Labyrinth has indicated significant potential to increase the resource both along strike and to depth.

## Maiden JORC Mineral Resource Estimate Delivered

Strong drilling success enabled high-grade Inferred Resource, prepared by independent consultants RSC

Existing modelled strike of significant ~1.6km, with historical results indicating potential for over 2.3km

## Maiden JORC Resource in 2022 Provides Excellent Platform

Growth and Development pathway is clear, with mineralisation already confirmed outside Resource extents

- ▶ Inferred Mineral Resource of 3 Mt @ 5g/t for 500,000oz (at 3g/t.m cut-off)<sup>1</sup>
- ▶ Notable high-grade component of 150,000oz @ 10g/t (above 6g/t cut-off)<sup>1</sup>
- ▶ High grades of up to 62.5g/t and widths up to 16m received across 5 individual lodes from maiden LRL drilling during 2022
- ▶ Key target Boucher Lode (not mined to date) totals 1 Mt @ 5.7g/t for 190,000oz
- ▶ Resource is open in all directions, supported by numerous high-grade intersections **hundreds of metres outside modelled extents<sup>2</sup>**; including:
  - LABS 22-02: 1.4m @ 13.32g/t (incl 0.9m @ 20.53g/t)
  - LABS 22-04: 2.9m @ 5.63g/t (incl 0.9m @ 7.9g/t)
- ▶ Exceptional metallurgical results strengthen development outlook, with **overall recovery result of 95.2%** at low reagent consumption rates<sup>3</sup>

1. Refer to Appendices and ASX Announcement 27 September 2022 for additional details  
 2. Refer to ASX Announcements 24 August 2022, 10 August 2022, 25 July 2022, 7 June 2022, 26 April 2022 and 10 March 2022 for detailed exploration results  
 3. Refer to ASX Announcement 24 November 2022 for detailed metallurgical test-work results
