The resource estimate was prepared by Telesto Nevada Inc. of Reno, Nevada in accordance with Canadian National Instrument 43-101 requirements.

Globex announced the option of the Bell Mountain property in a press release dated June 29, 2010 in an agreement in which Laurion may earn 100% interest in the property in exchange for 3.7 million Laurion shares, \$40,000 cash and a minimum of \$3 million in exploration and/or development expenditures. **Globex retains a sliding scale Gross Metal Royalty (GMR) which, at a price of over \$1,200 per ounce of gold, is equal to 3 percent of the gold and silver that may be produced.** The agreement also applies to any lands within 7.5 km from the outside boundary of the original 145 claim block.

Laurion’s contemplates “a conventional low cost open pit mining method with heap leach configuration” and has a primary goal “to successfully advance the project to production in the short to medium term”.

Globex is pleased with the progress achieved to date and looks forward to additional progress on the property.
