Globex Provides Update on Tyrone and Kewagama Royalty Properties

Rouyn-Noranda, Quebec, Canada. GLOBEX MINING ENTERPRISES INC. (GMX – Toronto Stock Exchange, G1MN – Frankfurt, Stuttgart, Berlin, Munich, Tradegate, Lang & Schwarz, LS Exchange, TTMzero, Düsseldorf and Quotrix Düsseldorf Stock Exchanges and GLBXF – OTCQX International in the US) is pleased to provide a brief update regarding our **Tyrone property** and **Kewagama Gold Royalty**.

Globex’s Tyrone property is located in the Eeyou Istchee James Bay region of Quebec and consists of 41 claims surrounded by Azimut Exploration Inc.’s Kukamas property currently subject to a joint venture with KGHM International Ltd.

Azimut, on January 20, 2025, announced initial near surface drill results from holes targeting a recent nickel, copper, platinum group element discovery. The initial drill holes returned significant mineralization including the following:

8.42% Ni, 0.55% Cu, 7.25 g/t PGE over 1.9 m

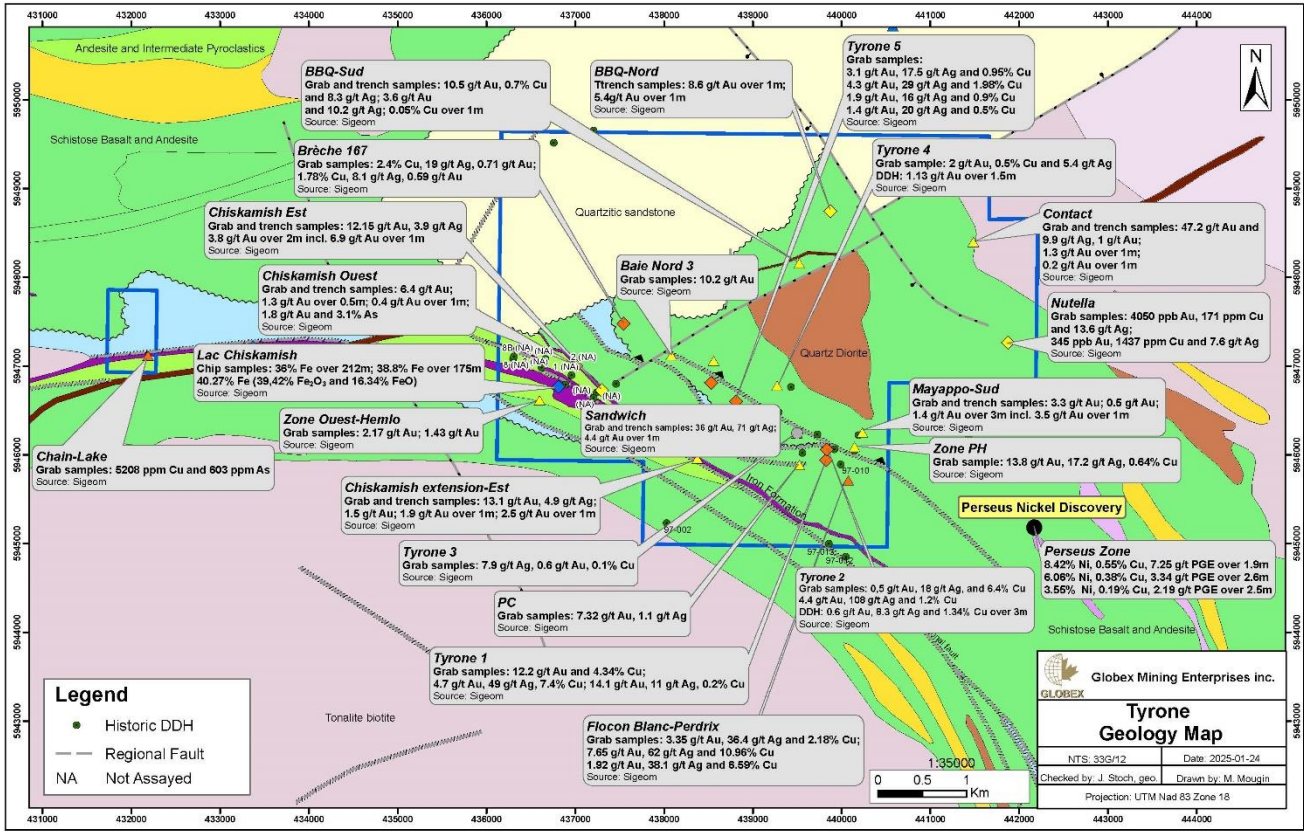

6.06% Ni, 0.38% Cu, 3.34 g/t PGE over 2.6 m

3.55% Ni, 0.19% Cu, 2.19 g/t PGE over 2.5 m

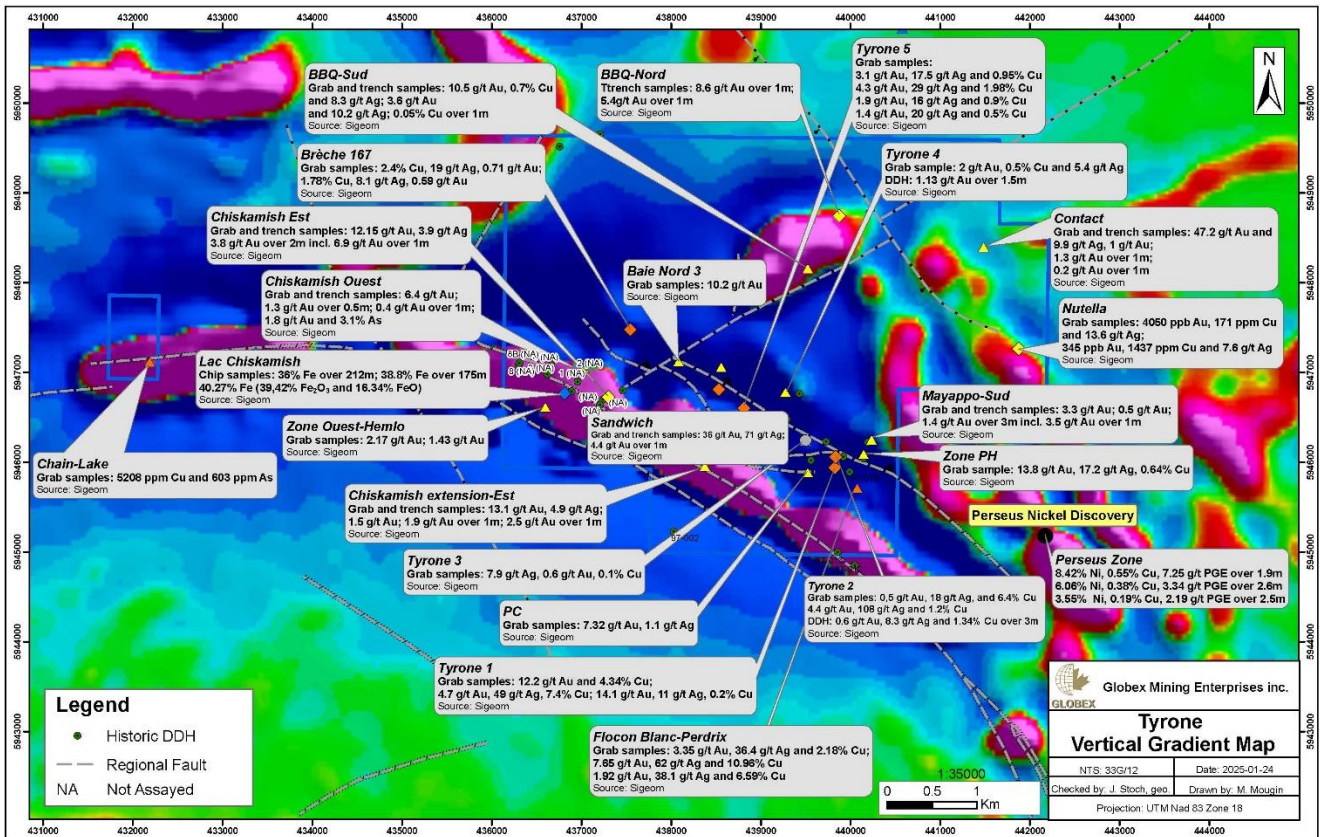

This discovery is located near the southeast boundary of Globex’s Tyrone property. Previous mapping and geophysics suggest that the mineralized rock formations trend onto Globex’s Tyrone claims. The Tyrone property has numerous showings and drill intersections of precious and base-metals as shown on the maps below.

Shareholders can access the [Azimut press release here](#) for details on the adjoining discovery.

Globex is also pleased to report that Radisson Mining Resources Inc. announced on January 13, 2025, that they will be undertaking 22,000 metres of drilling on the O'Brien Gold Mine property at Cadillac, Quebec.

A portion of the drilling will target gold zones on the **Kewagama Gold Mine** portion of the property on which **Globex holds a 2% Net Smelter Royalty**. Previous drilling on the Kewagama Gold Mine property was successful in intersecting high-grade gold mineralization such as the following:

- 7.97 g/t Au over 3.20 m**
- 6.40 g/t Au over 4.00 m**
- 9.70 g/t Au over 4.00 m, incl. 37.7 g/t Au over 1 m**
- 6.53 g/t Au over 4.50 m**
- 7.13 g/t Au over 1.00 m**

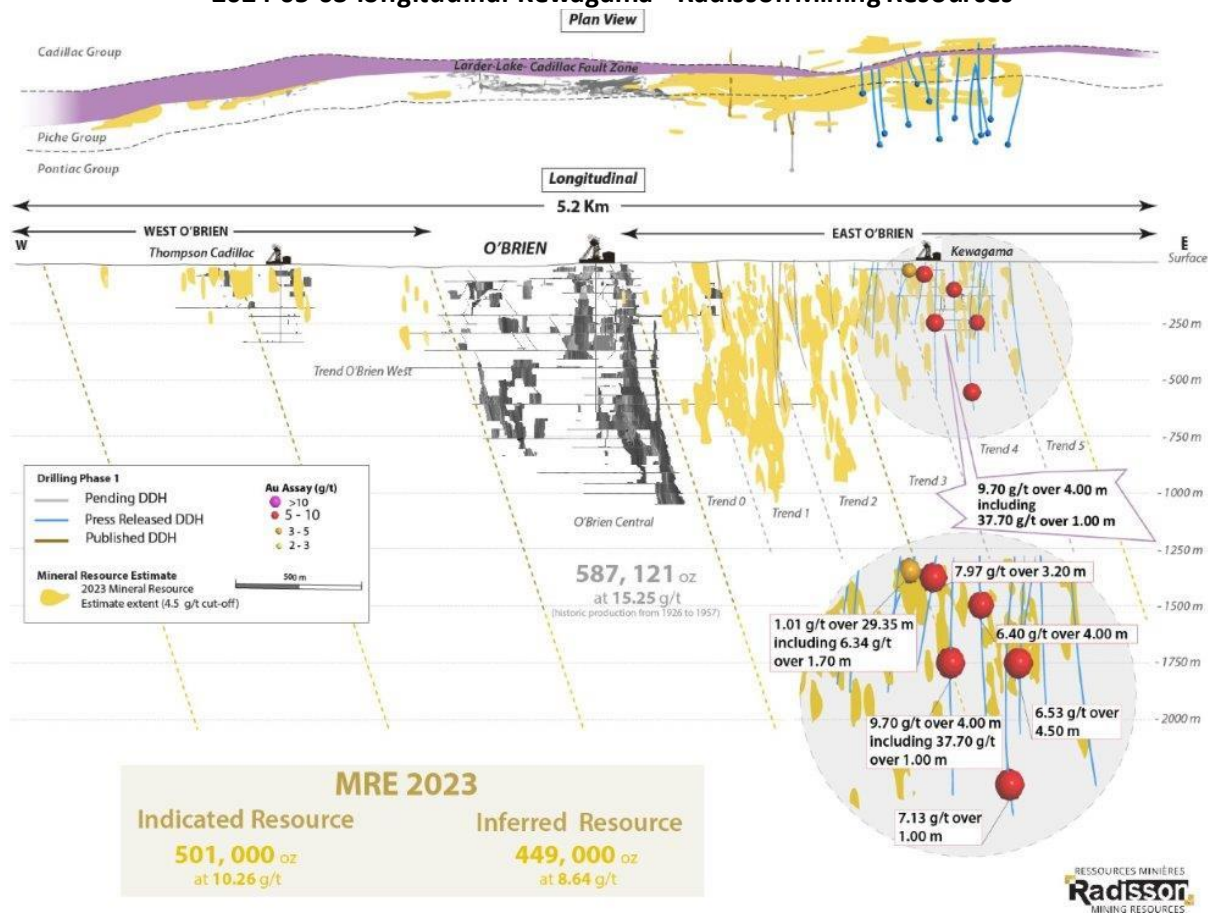

Source: Radisson [Press Release of May 7, 2024](#).

Globex also holds a 1% Net Smelter Royalty on the western portion of the O'Brien property covering the **New Alger Gold Mine (also called the Thompson-Cadillac Gold Mine)**.

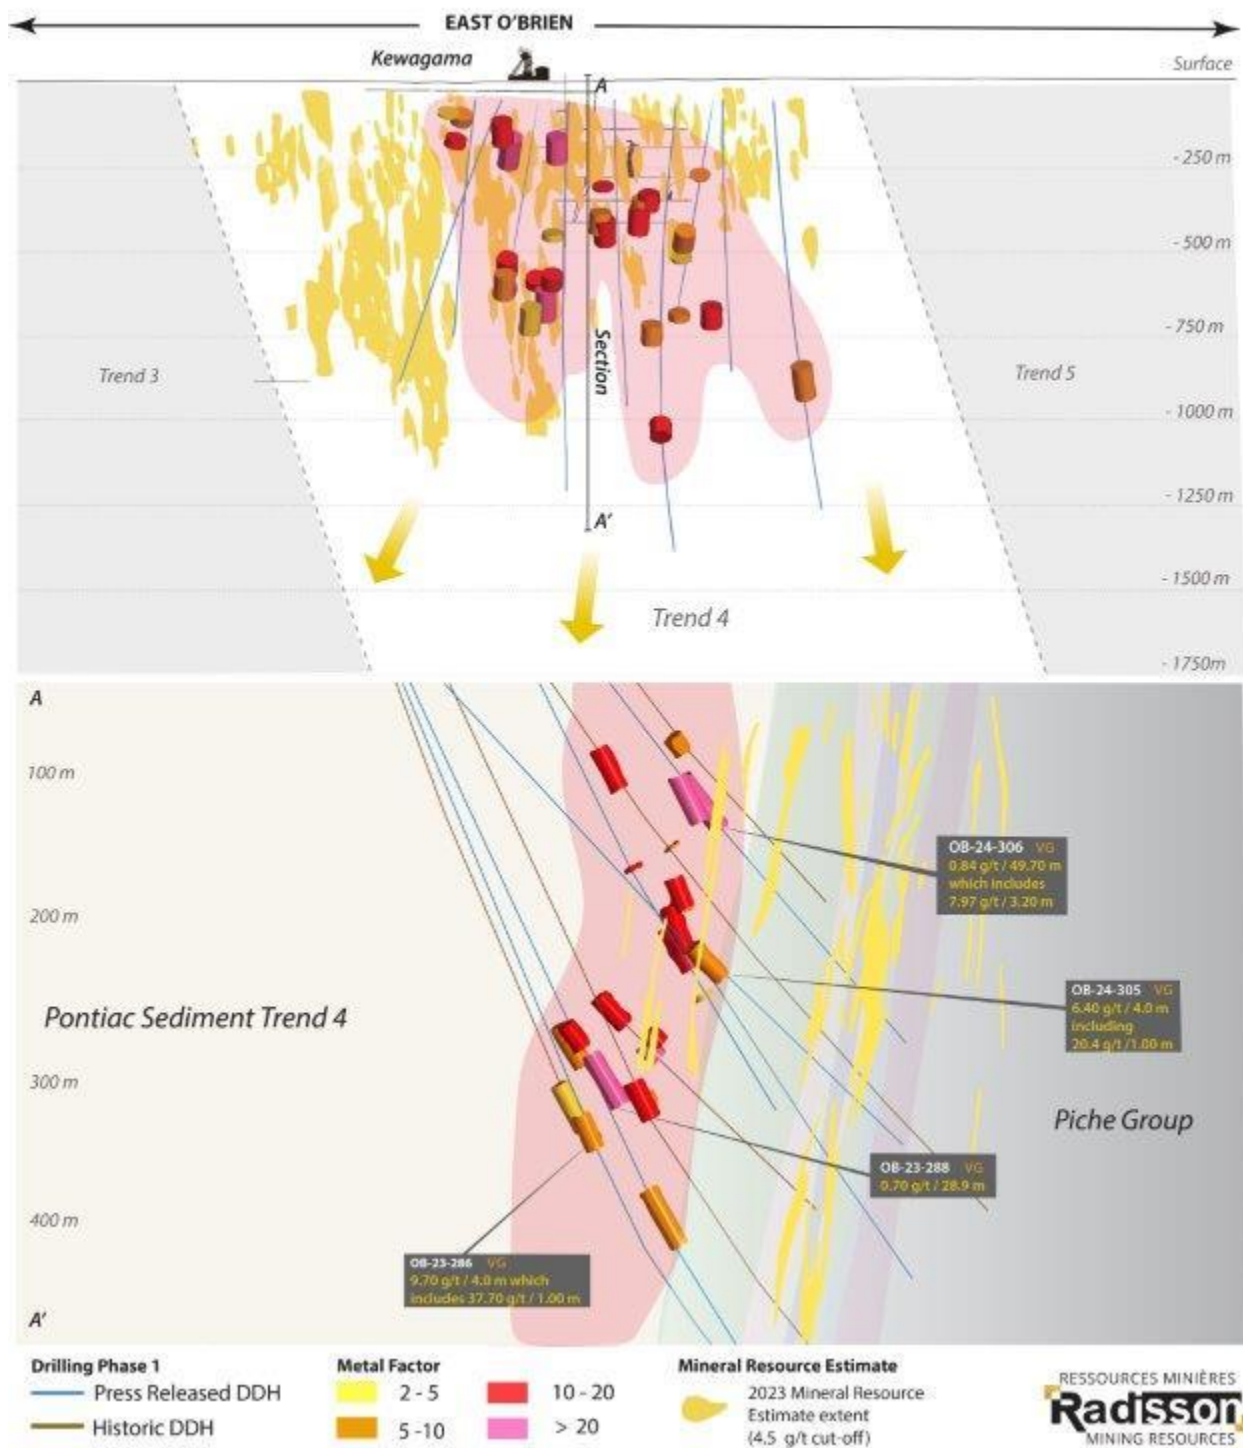

Below please see a longitudinal section of the O'Brien property highlighting the Kewagama intersections and a more detailed portion of the Kewagama Gold Mine portion of the longitudinal section and a cross section.

Globex is very pleased by the potential progress indicated in both property areas.
