Globex reports High-Grade Antimony Results on its Bald Hill Property and Drilling Starts at its Lac Escale Lithium Royalty

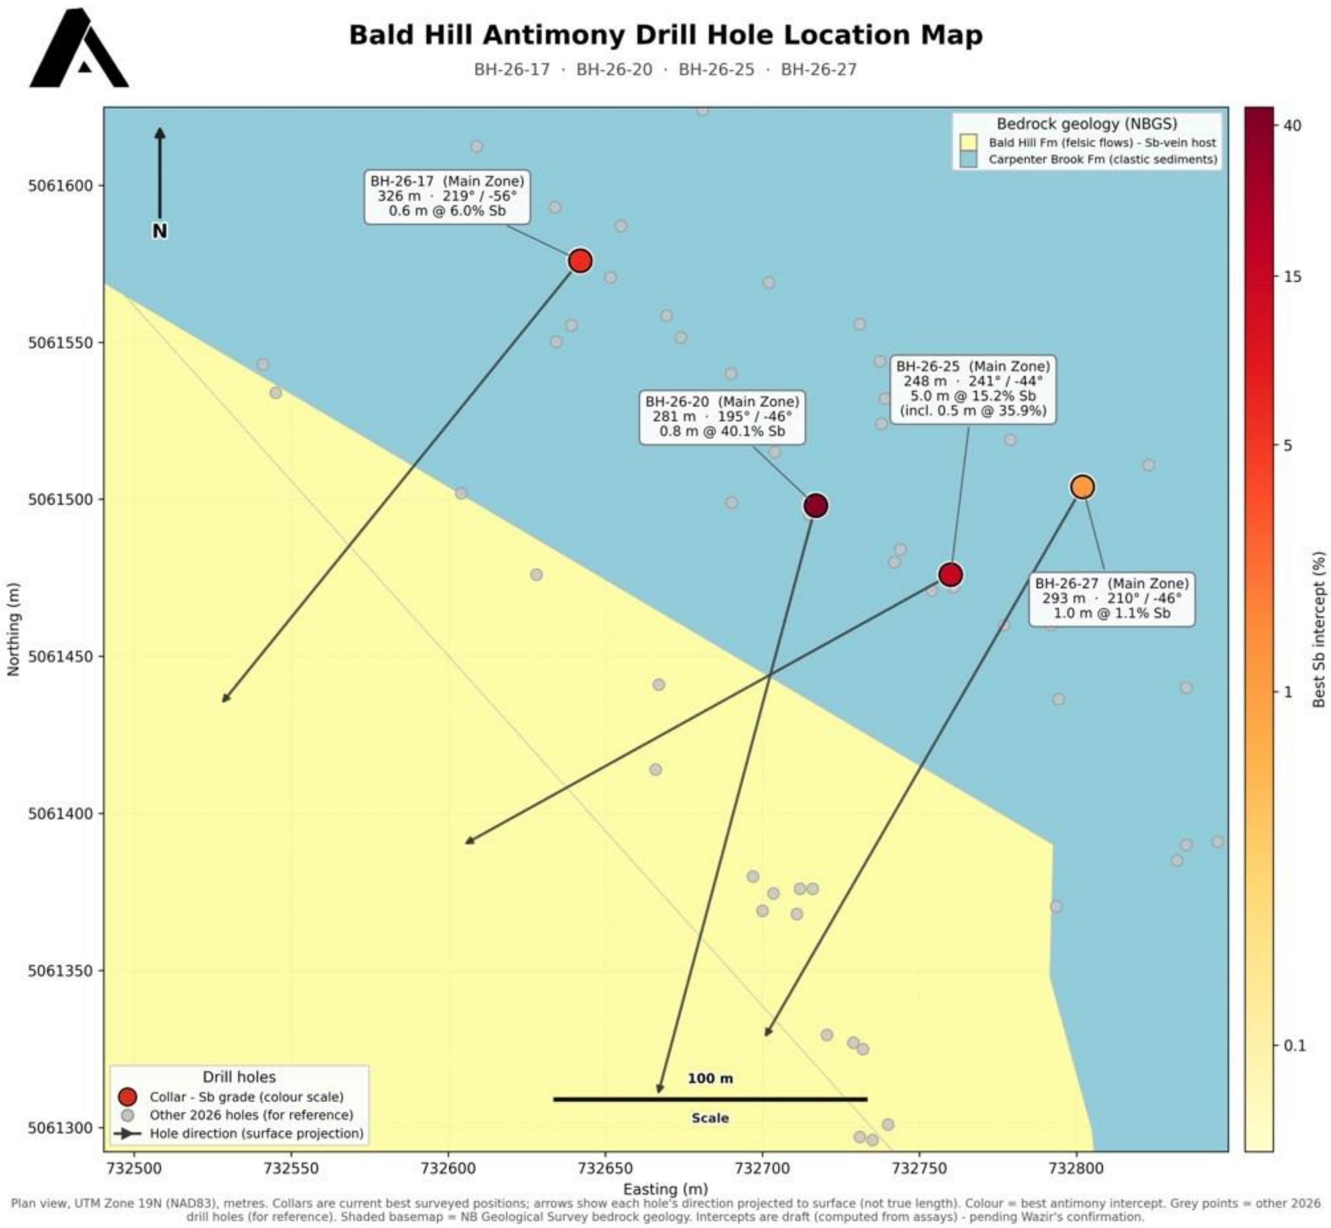
Toronto, Ontario, Canada. GLOBEX MINING ENTERPRISES INC. (GMX – Toronto Stock Exchange, G1MN – Frankfurt, Stuttgart, Berlin, Munich, Tradegate, Lang & Schwarz, LS Exchange, TTMzero, Düsseldorf and Quotrix Düsseldorf Stock Exchanges and GLBXF – OTCQX International in the US) is pleased to announce exploration news from our partners: Antimony Resources Corp. (CSE: ATMY, OTCQB: ATMYF, FSE: K8J0, "Antimony Resources") and Brunswick Exploration Inc. (TSX-V: BRW, OTCQB: BRWXF, Frankfurt: 1XQ, "Brunswick"). **Antimony Resources has announced high-grade antimony results from drilling on the Main Antimony Zone at the Bald Hill property in New Brunswick**. The Bald Hill Property is currently under option from Globex to Antimony Resources. The drill holes reported are part of the current drill program totalling approximately 18,000 metres which Antimony Resources intends to expand the mineralization in the Main Zone and explore the New Zones identified on the property. **Brunswick has announced that it has begun a new summer drilling program on its Mirage Lithium project totalling 4,000 metres**. Globex holds a 3% GMR royalty on the Mirage lithium project claims (Lac Escale property).

Highlights from the Antimony Resources Announcement

- **High-grade values included 13.14 % Antimony (Sb) over 2.45 m in drill hole BH-26-20 and 16.65% Sb over 5.05 m and including 33.40 % Sb over 1.10 m in drill hole BH-26-25 (Exhibit 1).**
- Thickness of these intersected mineralized zones average approximately 4.5 metres with a mineralized zone of 15.9 metres in drill hole BH-26-27 (Exhibit 1).
- Current results include four drill holes which were drilled from the west side into the Main Zone.
- All holes intersected antimony-bearing stibnite.
- The intersections are predominantly at depths of approximately 100 to 150 metres below surface. With one zone at a depth of 260 metres.
- The drill hole intersections often include multiple zones of mineralization. For example, drill hole BHW-26-25 intersected three zones over a drill hole length of over 44 metres (Exhibit 1).

Shareholders may access the detailed Antimony Resources July 6, 2026 press release announcing the drill results in the Main zone and additional details by clicking here.

Exhibit 1. Locations of Drill holes BH-26-17, BH-26-20, BH-26-25 and BH 26-27 at the Main Zone on the Ball Hill Property. Note: Drilling was conducted from the east side to intersect the Main Zone. Only reported holes are labeled, other drill holes in the vicinity shown as circles.



<u>Highlights from the Brunswick Announcement</u>

- Brunswick drilling will initially target the lateral extension of the MR-1 and MR-4 dykes, which are the richest dykes to date at Mirage.
- The MR-1 dyke is in the northern part of the deposit and is defined over 400 metres in strike length and remain open in all directions. This dyke returned high grade results including 2.57% Li_2O over 25.8m in hole MR-23-02 (see December 4, 2023 news release).
- Drilling will then move to MR-4 dyke, the most evolved pegmatite on the project so far, located in the southern part of the deposit. It is defined over 600 metres in strike lengths and remains open in all directions. MR-4 also returned high grade results including 2.75% Li_2O over 16.2m in hole MR-23-14 (see December 4, 2023 news release).

- The campaign will continue with drilling untested spodumene pegmatite outcrops, particularly north of the Escale lake. Additional drilling is also planned to test new high-potential targets along the entire 8-km-long lithium-bearing corridor identified to date at Mirage with more than 350 spodumene pegmatite boulders and locations with spodumene in tills so far. Drilling will be conducted using a helicopter-borne drill rig over a period of approximately two months.
- Mirage (Lac Escale) has an inferred Mineral Resource Estimate of 52.2Mt grading 1.08% Li2O and Brunswick sees significant potential to expand this existing resource.

Shareholders may access the detailed Brunswick July 6, 2026 press release announcing the drill program plans can be found by clicking here.
